How to Check for a Leak on the new Meters

Open the lid on top and wipe finger or shine a flashlight on the glass screen and the numbers will appear.

First series of numbers showing are 888888

Second series of numbers showing is the actual reading

Then wait a minute

Third series of numbers are three numbers on right hand side are gallons per minute

If a leak is going on – a little “faucet” will be flashing on and off. If the “faucet” stays on – a continuous leak going on. The “faucet” will show up in upper left hand corner.

Make sure you put lid back on to keep screen clean.

Please remember to place the lid back on the meter pit.
